

# Big Fuzz Pedal

A classic fuzz pedal that delivers a wide range of tones. Use it for vintage 70s fuzz tones or dial it up for some 90s “wall-of-fuzz” tones. Available in 4 different models that give a different tone, feel and gain - three 4-transistor models: “Triangle,” (early 70s) “Ram’s Head” (mid 70s) and “Russian” (early 90s) and an opamp model (late 70s.).

---

## Controls

**Volume** - control to adjust the overall volume of the pedal.

**Tone** - control to adjust how bright or dark the pedal is.

**Sustain** - control to adjust the amount of gain.

## Features

- True-bypass
- 1/4" input jack
- 1/4" output jack
- 9V DC jack, negative tip
- Current draw: transistors: 4mA; opamp: 5mA
- Internal 9V battery clip\*

Made in the USA
