

Super Distortion Plus Pedal

Heading in a different direction, this pedal is another MOSFET-based circuit that provides a searing high-gain tone with a tight low-end and an aggressive midrange and top-end. It's tighter, more compressed and more aggressive, great for scorching leads and fast riffs.

Controls

Volume - control to adjust the overall volume of the pedal.

Tone - control to adjust how bright or dark the pedal is.

Gain - control to adjust the amount of gain.

Features

- True-bypass
- 1/4" input jack
- 1/4" output jack
- 9V DC jack, negative tip (4mA current draw)
- Internal 9V battery clip*
