

Swedish Meatball Distortion Pedal

A fun take on a popular hard-clipping distortion circuit that uses a single opamp with a low slew rate. It can give you a sweet overdrive to your clean channel or an over-the-top sizzle to your dirty channel. The pedal also comes with 2 switches for up to 5 different combinations to select alternate versions of popular mods to this circuit from over the years.

Controls

Volume - control to adjust the overall volume of the pedal.

Tone - control to adjust how bright or dark the pedal is.

Distortion - control to adjust the amount of gain.

Type - switch between diode type - silicon, LED, or germanium.

Clipping - switch between symmetrical (left) & asymmetrical (right) clipping (*doesn't apply to LED diodes.*)

Features

- True-bypass
- 1/4" input jack
- 1/4" output jack
- 9V DC jack, negative tip (4mA current draw)
- Internal 9V battery clip*
