

Wah Pedal

A classic wah pedal with modern features. Using the coveted Fasel inductor, it achieves a highly sought-after wah tone while giving the player a few different tonal options. Available in two models: "Vintage," with a yellow Fasel for a wider, more rhythmic 60's sound & "Lead," with a red Fasel for a more aggressive 70's/80's lead sound.

Controls

Q Control - control to adjust the width of the Q-factor from a rounded bell to a steep peak. Fully CW is the most narrow peak; Fully CCW is the most rounded peak.

Sweep Switch* - 3-way switch to engage 3 different frequency sweep ranges: guitar (middle position), baritone (forward position) and bass (backward position.)

Made in the USA
